Profile

I'm Oussama Hamdi, a recent graduate of the ALX Software Engineering program (powered by Holberton Inc.) with a specialization in front-end development. Familiar with the MERN stack, I'm eager to expand my knowledge and contribute to impactful projects.

Skills

Professional Experience

Junior Software Engineer, Branding Routes

Jan 2024 – present
London, England

- Actively contributed to 80% of project development in React Native, demonstrating rapid proficiency acquisition and adherence to industry best practices for mobile app development.
- Utilized analytical skills to troubleshoot and debug software issues, identifying root causes and implementing effective solutions.

Education

Holberton Inc. (ALX Program)

Jan 2023 – Apr 2024

Completed Software Engineering program

Projects

Responsive Dashboard

Developed proficiency in HTML and CSS through intensive training, enabling successful completion of my first multiple-page website project; created a custom framework to streamline development process and enhance code reusability

CSS-Powered Website with Advanced CSS Techniques

Furthered my proficiency in HTML, CSS, and JavaScript through advanced training, equipping me with a repertoire of advanced CSS techniques

JavaScript-Based Interactive Project

Completed my first JavaScript project, which was a bit challenging but helped me improve my problem-solving skills

ReactJS Agency Website with Responsive Design

Independently developed a responsive agency project using ReactJS, further advancing my expertise in working with its components and enhancing my web development skills
