Profile

With a solid foundation from the ALX Software Engineering program powered by Holberton Inc., I specialize in front-end development with expertise in the MERN stack. I am focused on furthering my skills and contributing to impactful projects, aspiring to expand into full-stack web development to tackle complex challenges and deliver comprehensive solutions.

Skills

HTML5, CSS3, JavaScript, TypeScript, React.js, React Native, Redux Toolkit, SASS, Bootstrap, Webpack, Node.js, Express.js, MongoDB, Git, Jira

Professional Experience

Software Engineer, Branding Routes

Jan 2024 – present

London, England

- Key contributor to **75%** of React Native project development, showcasing rapid proficiency growth and adherence to industry best practices.
- Troubleshoot and debugged software issues, resolving over **20** bugs, and enhancing app performance and stability.
- Refactored codebase, reducing app load time by optimizing code logic and improving overall code maintainability.
- Utilized Jira for task management and project tracking, resulting in improved workflow efficiency and team collaboration.
